

# PS40.2

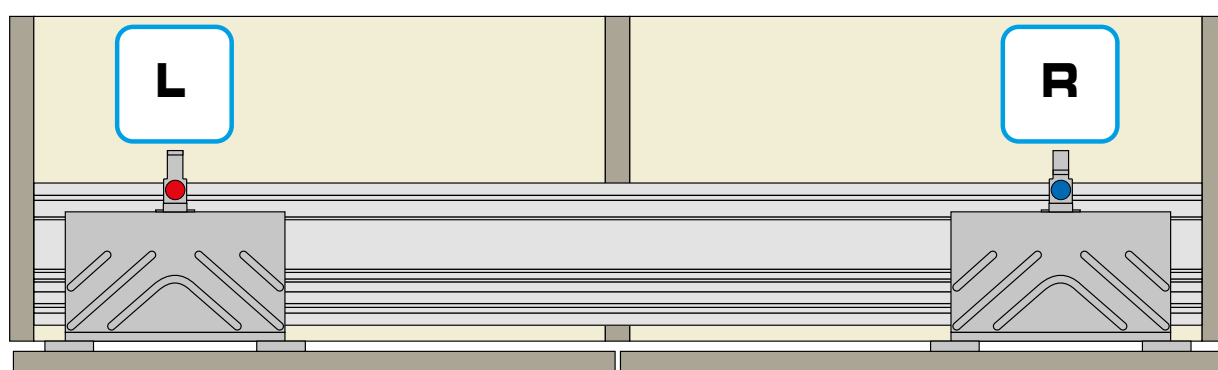

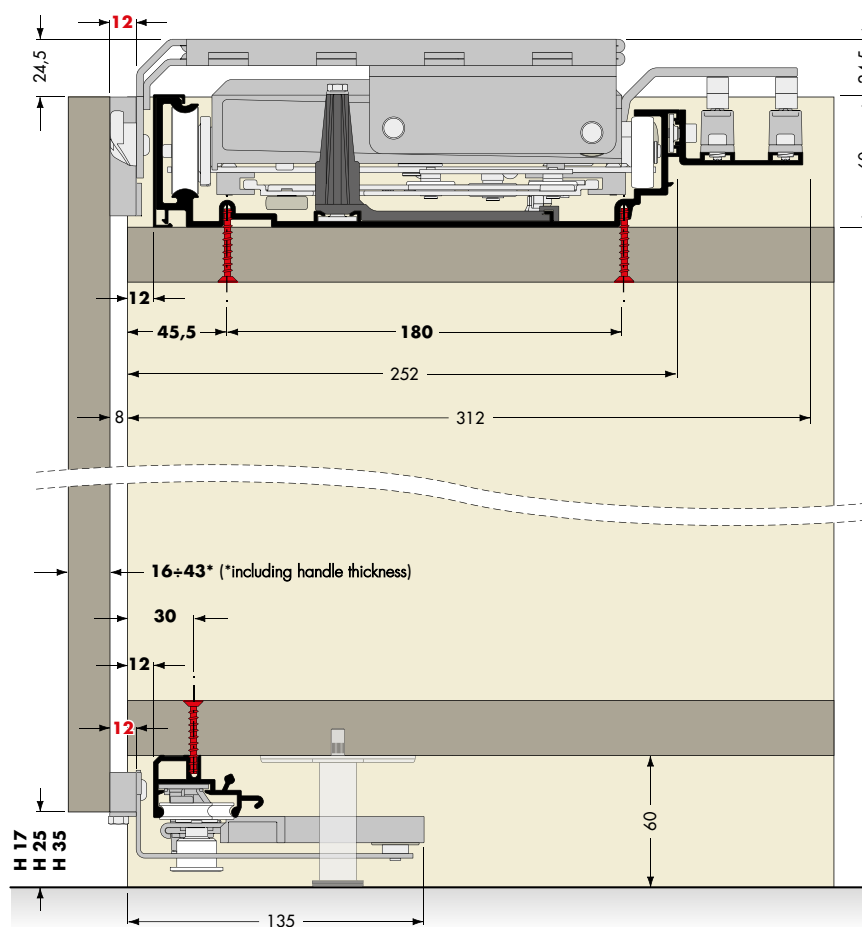

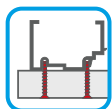

# COPLANAR SYSTEMS

Possible wardrobe configurations

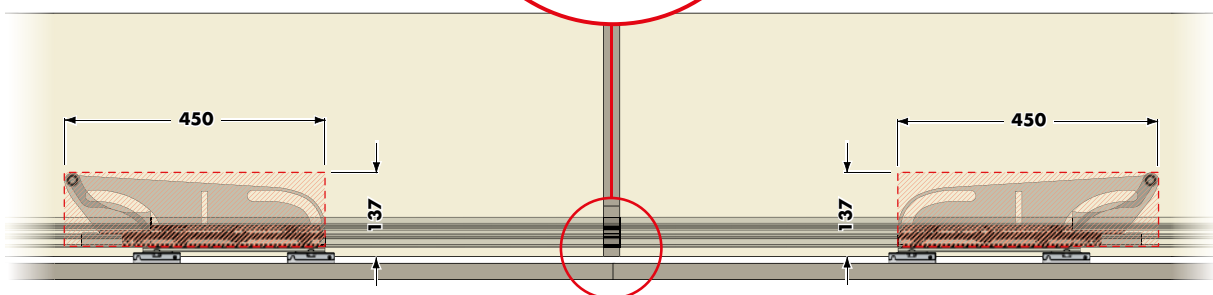

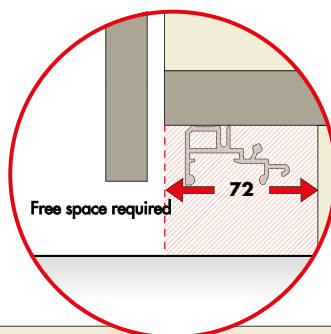

One system  
many options!

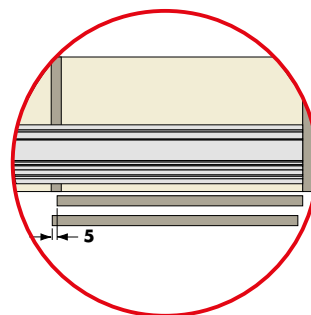

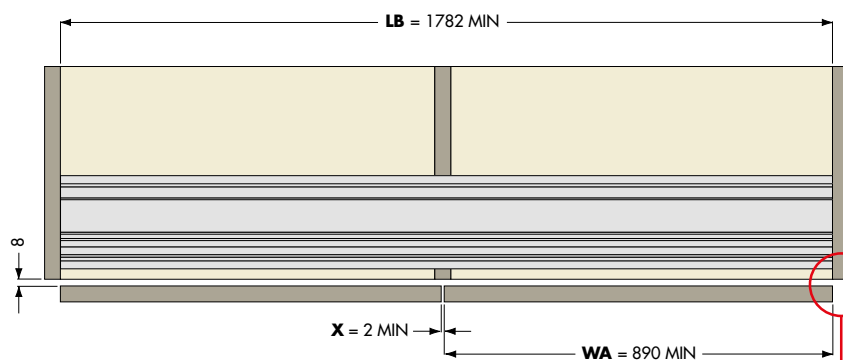

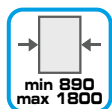

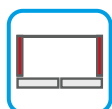

Free space required under the wardrobe in correspondence of the lower slide with closed door.

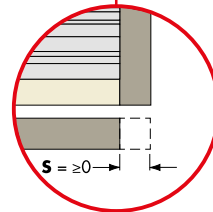

#### OVERLAPPING OF THE DOOR

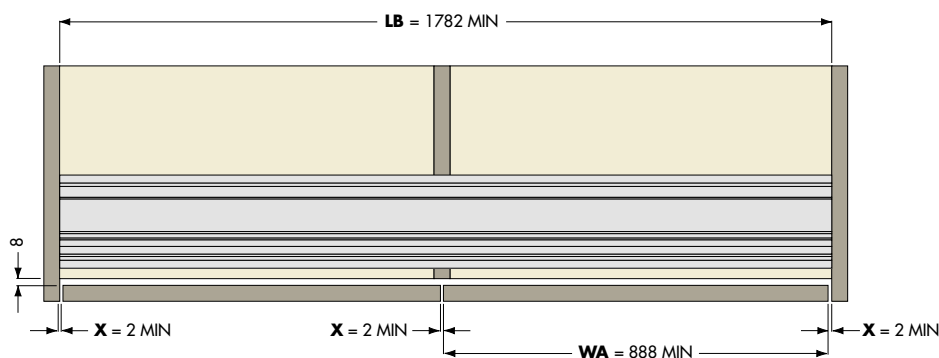

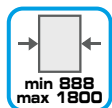

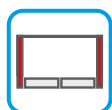

$$LB = 2WA + X - 2S$$

$$WA = (LB - X + 2S) / 2$$

#### ABBREVIATIONS:

**LB** = rail length  
**WA** = door width  
**S** = overlapping

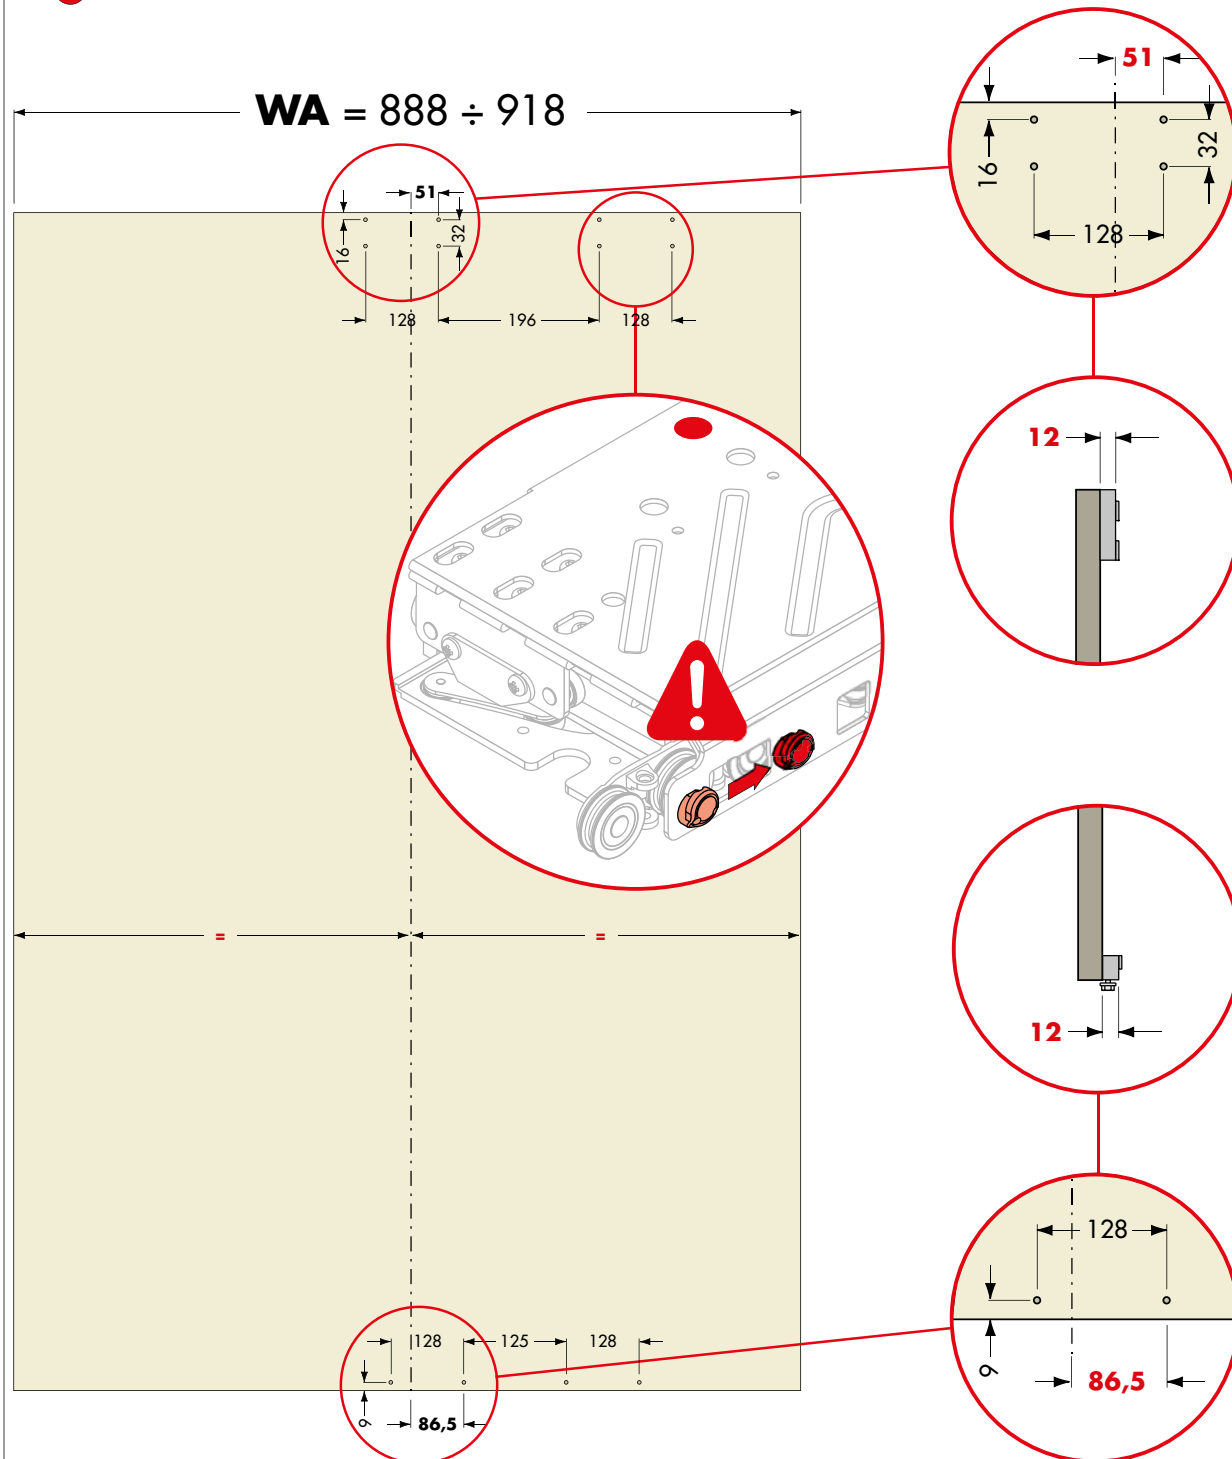

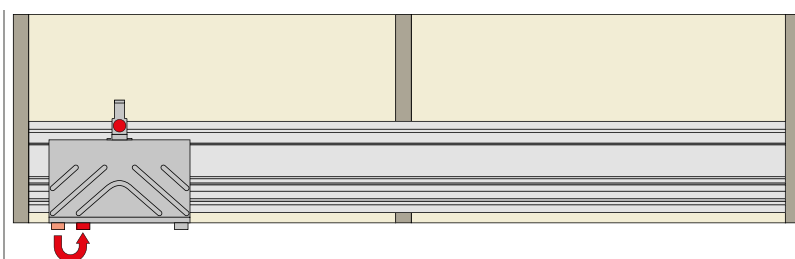

$$LB = WA + 3X$$

$$WA = (LB - 3X) / 2$$

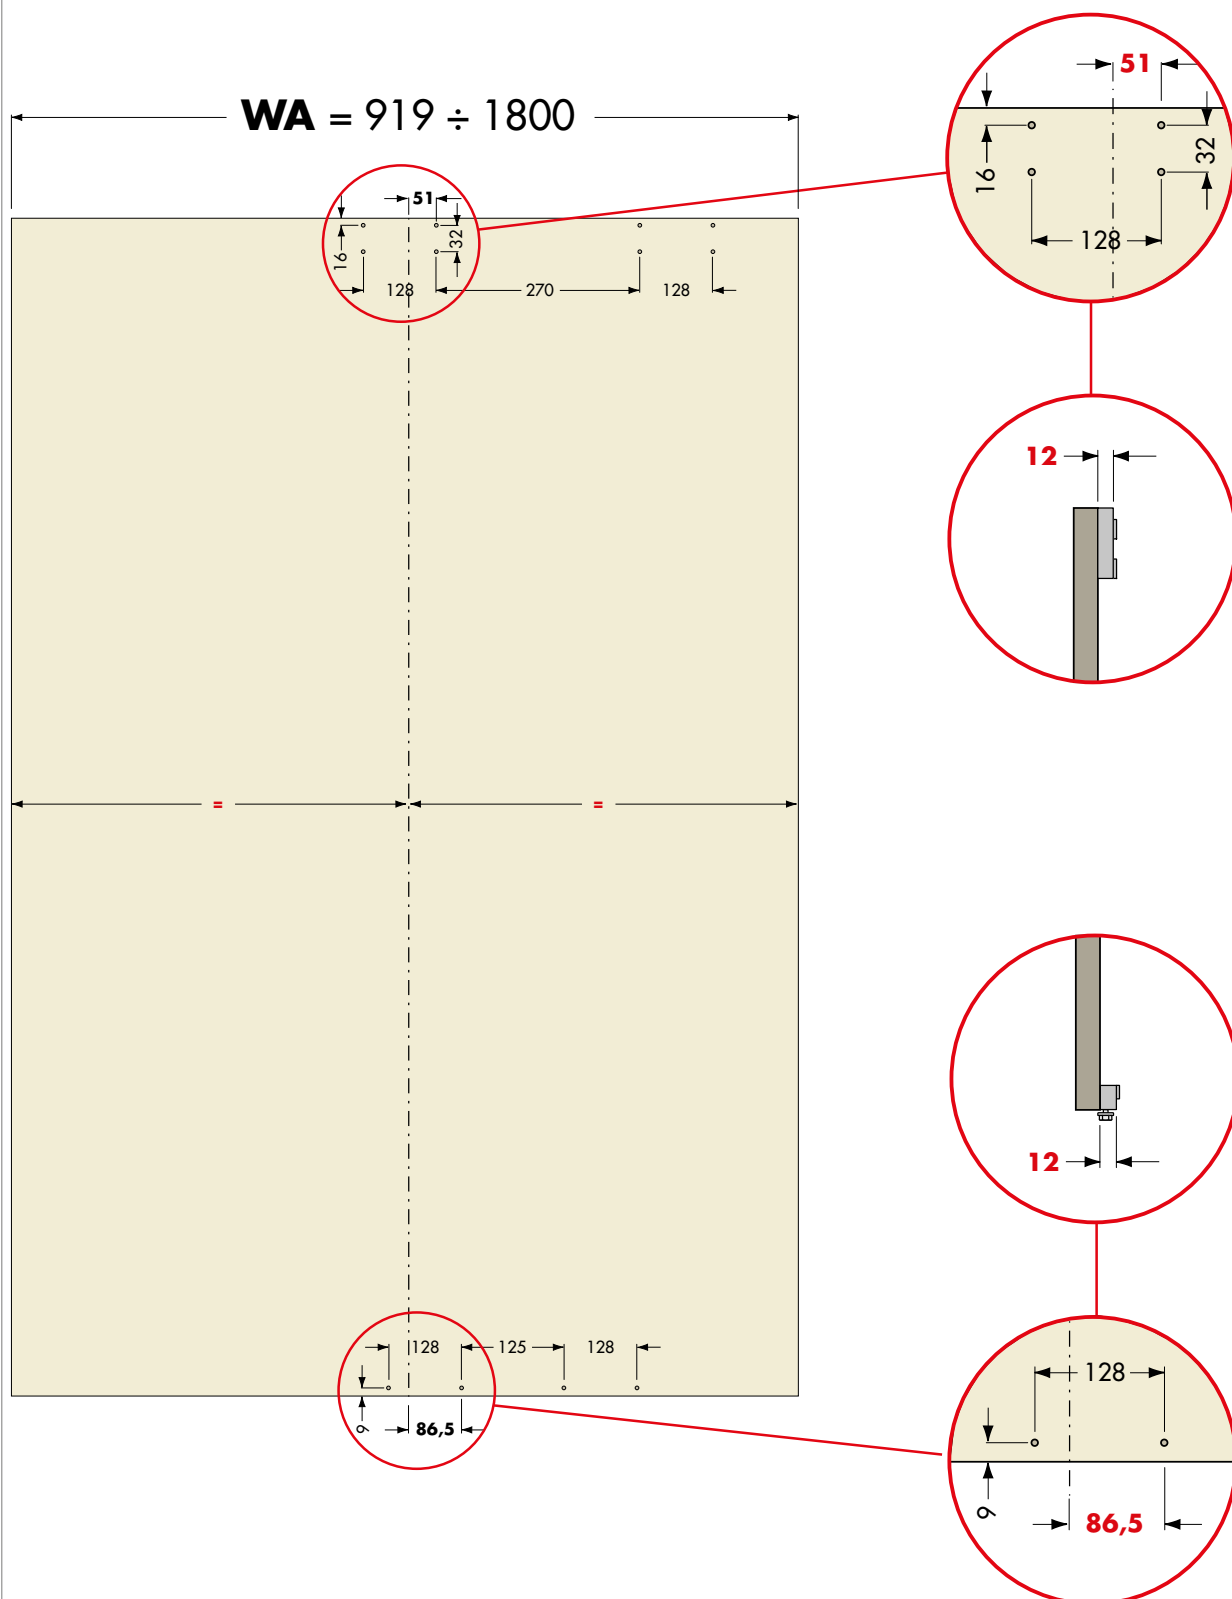

The starting reference for milling the doors is always the central axle of the door, whatever its width is.

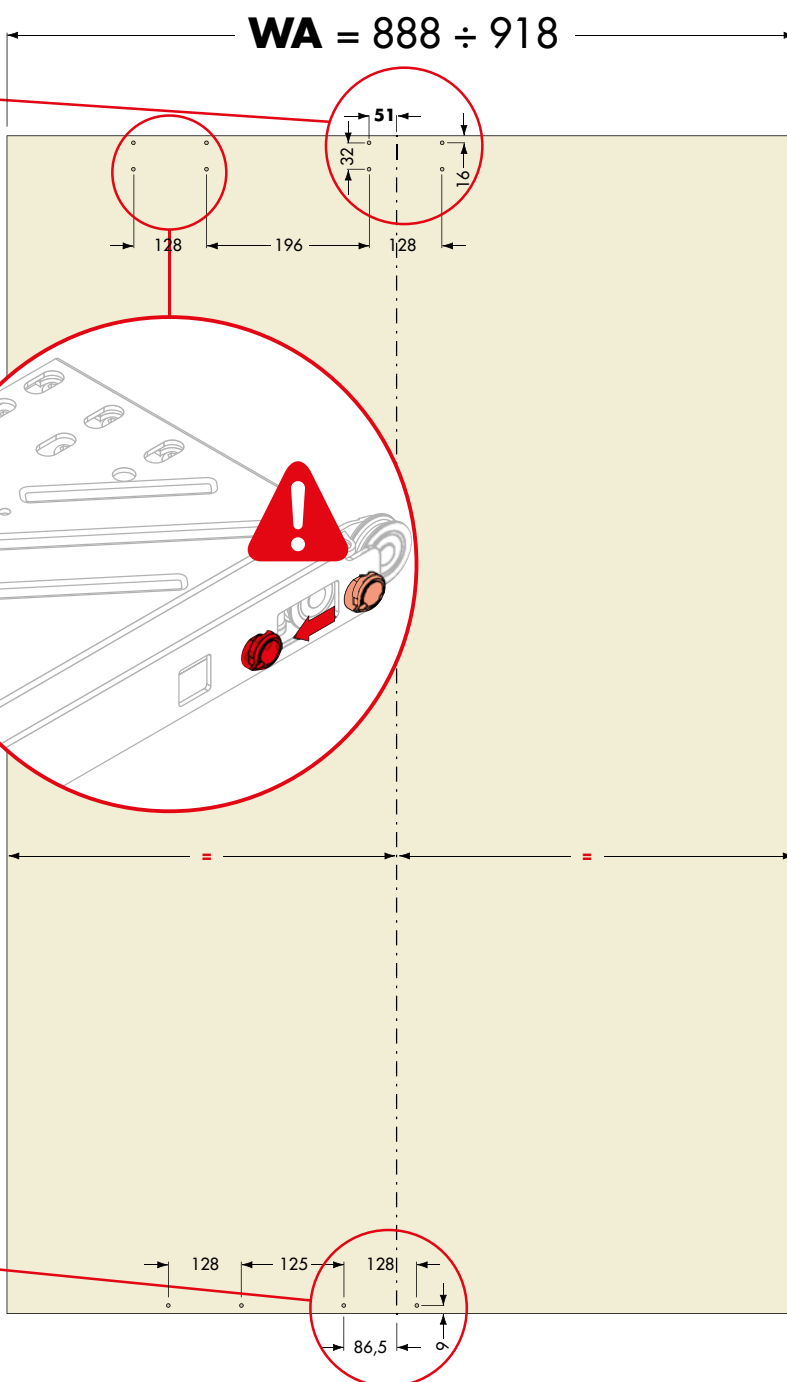

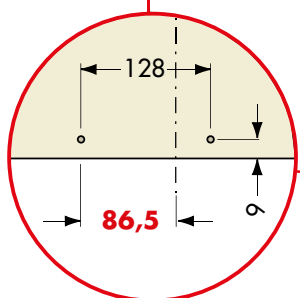

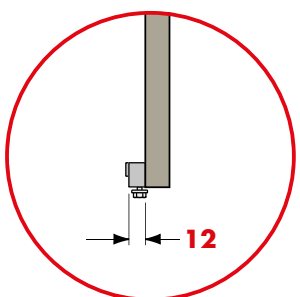

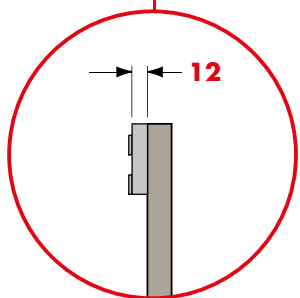

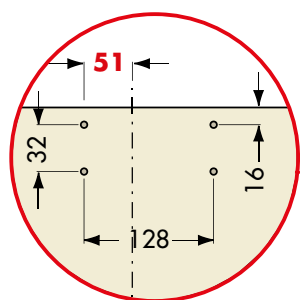

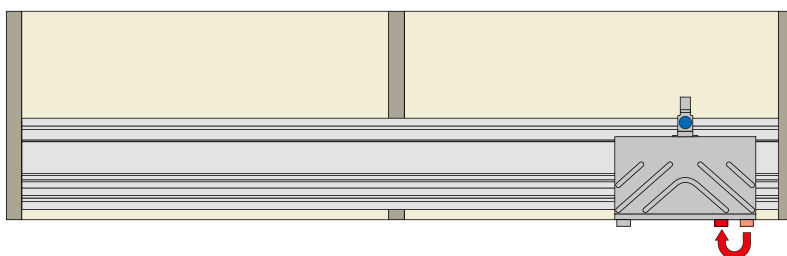

The starting reference for milling the doors is always the central axle of the door, whatever its width is.

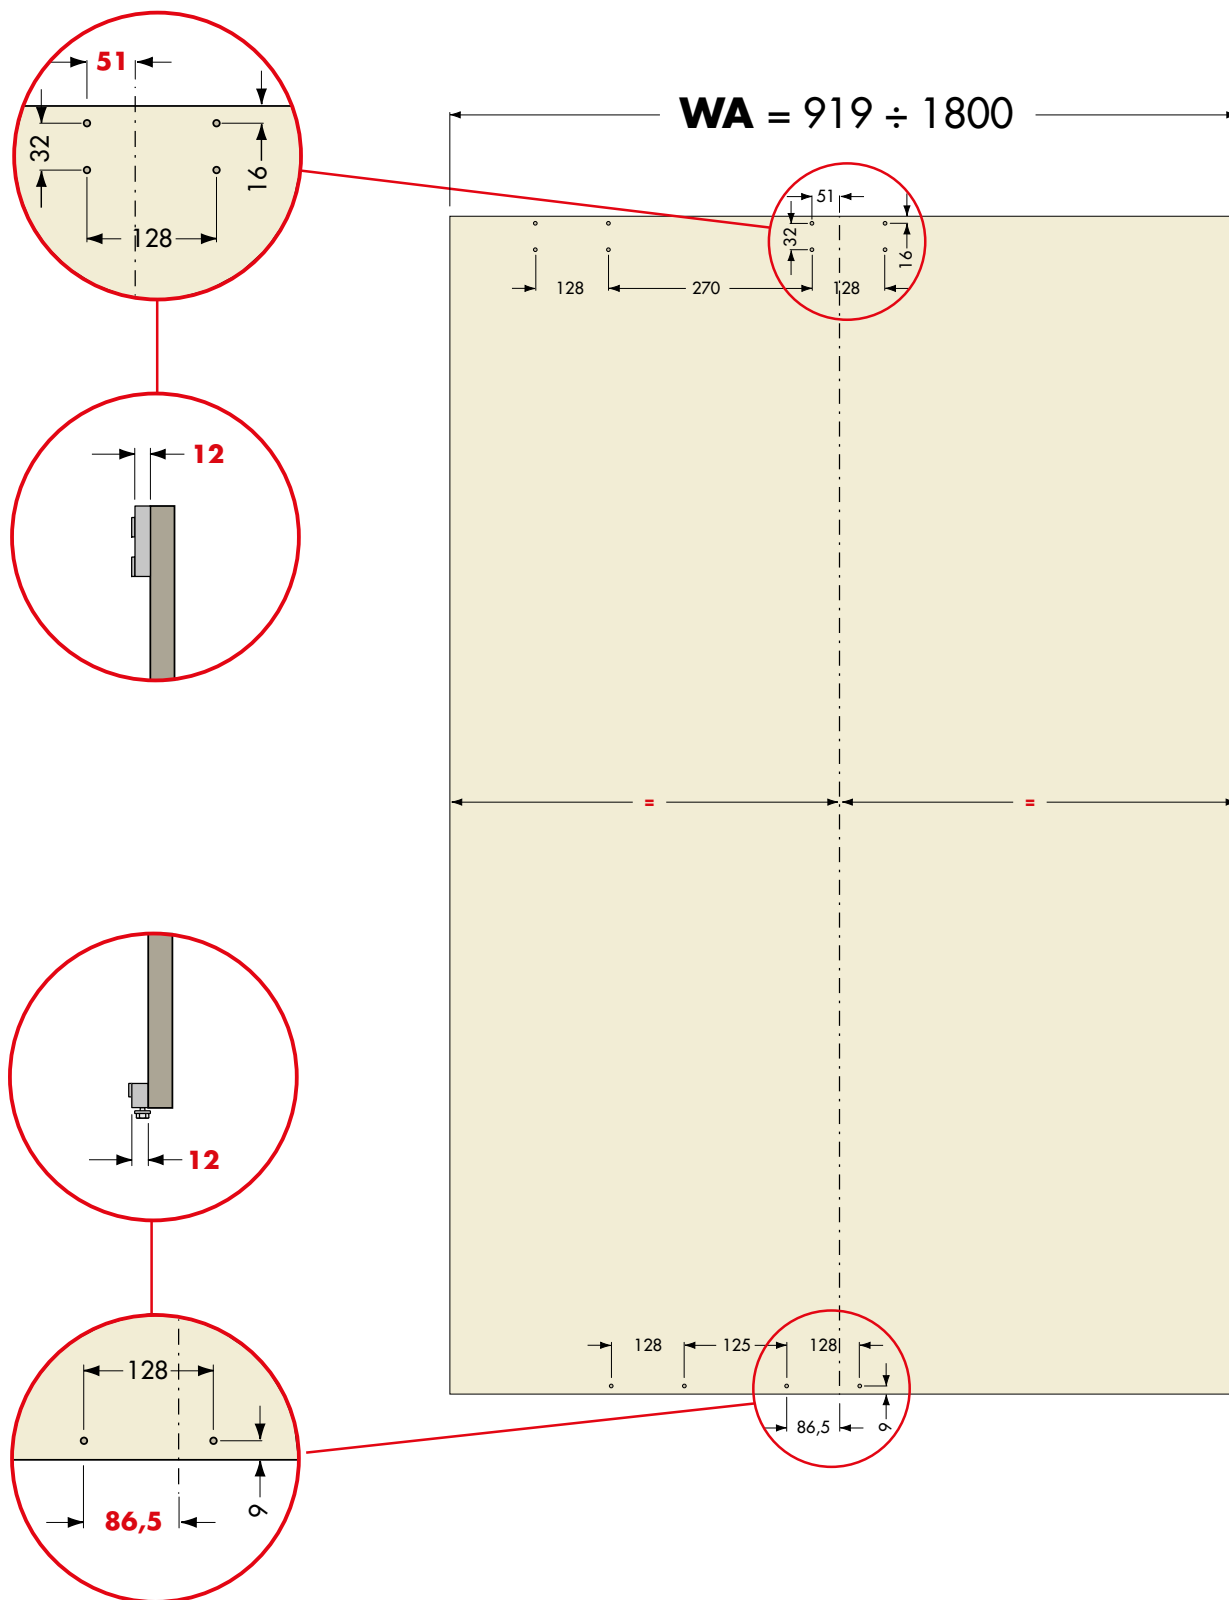

The starting reference for milling the doors is always the central axle of the door, whatever its width is.

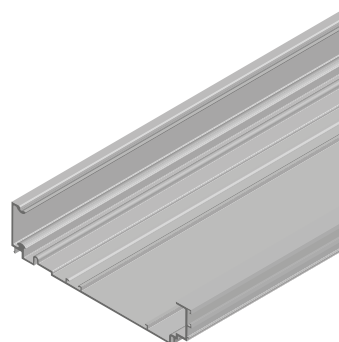

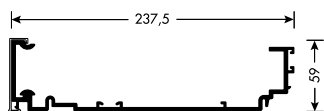

The starting reference for milling the doors is always the central axle of the door, whatever its width is.

## PS40.2 | Parts list

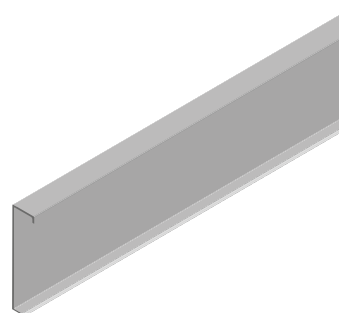

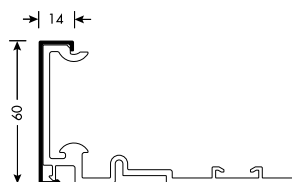

### PR407000013A

Upper rail.

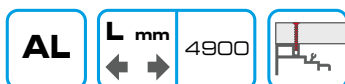

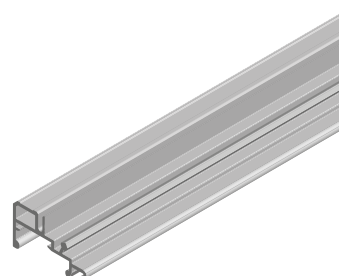

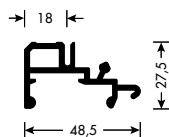

### PR407000012A

Cover profile.
