

LIBRA H6 LIVING SETTINGS

WALL CABINET APPLICATION

- Capacity loading 120 Kilos per piece (240 Kilos per pair).
- In accordance with the European Regulation DIN 68840.

LIBRA H6

LIBRA H6 is the latest development in the cabinet hangers program offered by Italiana Ferramenta.

The **LIBRA** hangers are to be installed behind the rear panel with the only small cover caps left visible inside the cabinet.

LIBRA is a very resistant and reliable solution as the zinc alloy body is sensibly thicker, and therefore stronger.

All the models within the **LIBRA** family feature an innovative **ANTI-TURNOVER** device which is covered by patent.

LIBRA H6 is the left/right cabinet hanger with 2 semi-circular pins Ø15mm + pre-inserted screw for the top (if required).

It features an innovative locking device to the side panel conceived to sensibly increase the capacity loading of the cabinet.

The axial-locking of **LIBRA H6** allows the fixing screw to penetrate the side panel beyond the back panel groove.

Also featured in the **LIBRA** family are 5 types of wall plates and 1 types of wall bars made of very thick zinc-coated steel and hardened by punched impressions.

Wall bars and wall plates feature oval holes which facilitate

the correct positioning and give the possibility to carry out the horizontal adjustment.

Placement of the holes for wall-fixation has been optimised to reduce the stress on the plates and on the plugs.

LIBRA cabinet hangers allow to adjust the cabinet vertically and horizontally. The 2 movements are 100% **INDEPENDENT** of each other and therefore make the adjustments much easier and more efficient.

The adjustment and the locking of the **ANTI-TURNOVER** bolt can be carried out from the inside of the cabinet by using a standard PZ2 screwdriver.

Steel, Zinc alloy and Engineering plastic according to related version.

PAT. PENDING

INSTALLATION UNDER THE CABINET TOP

INSTALLATION ON THE WALL

- For details refer to "LIBRA WALL PLATES: LIBRA WP5"

COVER CAP INSERTING

- For details refer to "LIBRA COVER CAPS"

It is the responsibility of the customer:

- to ensure that the wall is of a suitable quality to hold the unit fixing in place.
- to use the proper hardware fittings according to the construction of the wall.

For more specific information, please refer to the WARNINGS section at the end of the catalogue.

ADJUSTMENTS

1
VERTICAL ADJUSTMENT
13 mm

2
IN-DEPTH ADJUSTMENT
12 mm

3
ANTI-TURNOVER LOCKING
Stop screwing the red bolt when it touches the wall plate

LIBRA H6 APPLICATIONS

BENEFITS OF LIBRA H6 AND LIBRA CH HANGING SYSTEMS:

- Vertical and in-depth adjustments, as well as the locking of the cabinet, can be easily and smoothly carried out from the inside.
- The hanging system is never interfering with the slides for drawers as it is placed behind the back panel.
- Absolutely no mills, drillings or grooves required inside the cabinet.

In the **current absence of a unifying European norm** which sets the standards for testing procedures aimed at defining capacity loadings of hanging systems conceived for suspended base units, we Italiana Ferramenta have simulated some of the most critical scenarios.

The following simulations are meant to give our customers valid reference points concerning cabinet dimensions, weights, recommended loading capacity even when loaded drawers are opened.

The reported data, empirically obtained, exclusively refer to the constructions and examples shown, correctly positioned and assembled by using WP5 wall plate.

The customer must ensure that the wall is of suitable quality and structure.

Other important factors to be taken into consideration are determined by:

- the type of side panel, the actual thickness and the material used. It is recommended to use chipboard panels. For MDF panels please contact us for further information concerning the screw fixing.
- the type and dimensions of the screws used.
- the actual positioning, depth and width of the groove milled for the back side installation.
- the capacity loading of the drawer slides used as well as the actual construction of the drawer.

We always recommend to test a complete cabinet.

For cases which differ from the ones reported, please contact us.

FURNITURE TYPE	CAPACITY LOADING 	
	LIBRA H6	
Cabinet	100 Kg	
Cabinet + drawer	70 Kg + 30 Kg	

FURNITURE TYPE	CAPACITY LOADING 	
	LIBRA H6	
Cabinet	180 Kg	
Cabinet + drawer	150 Kg + 30 Kg	

FURNITURE TYPE	CAPACITY LOADING
